A message from our CEO

From the very beginning, our motivation was set on maintaining a steady pace and increasing our output.

Our success and growth has caused us to introduce new proactive restructuring which in turn produced improved productivity. This has given us strong operating performance and the means to establish new important divisions that work within the SAPCO family.

The changes have also helped us in outperforming our peers in terms of quality, time management, and all aspects of project handling. And just as important as our new business accomplishments are. We aim to maintain focus on how they were achieved while not forgetting our commitment to high standards in safety, and healthy work environments.

The future will always be a challenge that we look forward to, and we will be ready with new investments in the latest equipment, and additional training for our engineering team.

We hope to have you part of our SAPCO family and enjoy doing business with you.

Ayed Khashman
CEO & Managing Director

**LEADING THE WAY
THROUGH
EXPERIENCE &
LEADERSHIP**

**THE
HISTORY
BUILDING
SINCE 2006**

“To add value to our customers and society through the quality and timely execution of projects, while always maintaining project integrity and budget.”

- Our Mission

In a short period of time we have executed many projects, of all shapes, sizes, and scopes. During all of them, we have provided excellent services during every phase of every project.

Our team has been put through the tests, with tight budgets, off-site challenges, and unthinkable site conditions, we've always managed to come out on top with specific timed solutions.

If there is one thing that leads us from all of our other registered works, it would be civil. From residential, to office buildings, schools, to warehouses, farms, to contracts with the civil defense. We've created the proper workflow to have your project completed from A to Z.

Our team does not only excel at your basic construction, but we also work on the finishing product. This enables you to move right in without having to go anywhere else, after we've finished sweeping up of course.

The business approach may seem local at first, but our work and our procedures are tried and true to international standards. With regard to safety, and honesty. We work hard to make building projects simple and easy to work with.

2007 Begin construction of several schools in cooperation with the ministry of education. Riyadh

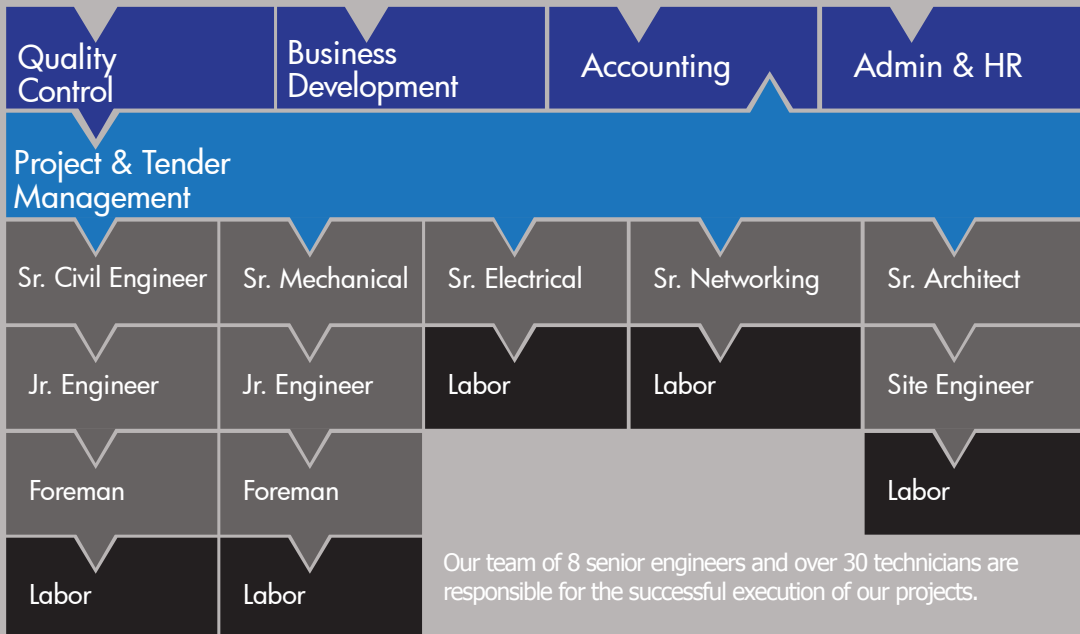

2008 ICDOC/Industrial City STP water civil works. Riyadh

2009 In cooperation with the border guards, two STP projects. 6000m², Riyadh.

2011 WETICO HQ Office. Riyadh, and Al Marai civil works., Kharj.

PROFESSIONAL & COMMITTED

General Manager

TYPES OF SERVICES

CIVIL

Trained and kept up to date with the latest methods of building, our team works to ensure the most efficient materials are used and applied properly for long lasting value.

MECHANICAL

Refrigeration and cooling can be accomplished in many different ways. Our approach looks at additional factors, such as efficient cooling through chiller systems, and low cost management solutions that will work for years on end without fear of large modifications.

ELECTRICAL

Ensuring the proper amount of plugs and gauges are just part of the solution. Even distribution and load balancing, alongside of emergency lighting solutions and self running power backup are just some of the services we enjoy working on.

NETWORKING

IP Telephony solutions, as well as security camera surveillance, coupled with backup, and network ready deployment through both wired and wireless solutions are all that your building will need for now and the future.

ARCHITECTURE

Layouts that prove to not only be appealing, but also functional so that you are in a comfortable environment. Proper themes and accompanying styles are thought thoroughly with the above departments to master functionality.

Throughout the years, we've been producing efficient and profitable projects that both we, and the client enjoy working on.

This hasn't stopped us from thinking about the society that we live in. Corporations have an important factor in our business, but our society is where we live and will spend our future.

Our team always finds pleasure when we take on projects that improve our surroundings and the people around us.

Taking care of our future, with projects approved by the ministry of education. Schools, both public, and private, with additional touches provided by our team.

Taking care of those who protect us, with projects approved by the ministry of defence.

Thinking about the future when it comes to the environment, making sure we do our best to keep our machines working as efficiently as possible, all in part to keep our earth a safer and greener one for tomorrow.
